Usage specifications and recommended animal species:

Product used in the composition of animal feed and animal diets for monogastric organisms, mostly in poultry and pork farming and partly in pet food and biodiesel production.

User guide:

User guides are customized in accordance to each client's standards and technical orientations.

Validity term:

6 (six) months.

Ideal Storage conditions:

Products must be stored on raised platforms in clean areas at cool room temperature away from walls and direct sunlight. Platforms should be arranged separately by product type and in accordance to internal traceability procedures.

Further restrictions and recommendations:

The use of this product on ruminants is prohibited.
